## Our Services

**Savage Range Systems** offers total range solutions for the finest, safest, and cleanest, lowest-maintenance shooting ranges, bullet traps, steel target systems, and 360-degree shoot houses. Bullet traps utilizing wet **Snail™** technology, combined with low angle ramps and 360-degree deceleration chambers, safely capture bullets while virtually eliminating splatter, ricochet and airborne lead. Specializing in custom systems, including fully-automatic .50cal BMG, **Savage** is the choice for military and law enforcement agencies nationwide, commercial and private shooting ranges, and for virtually every firearms and ammunition manufacturer.

## Personnel Update

**Eric Payette** has joined us in the position of **Range Technician**. With more than eleven years of experience working in the field of metal fabrication and welding, **Eric** is a welcome addition to our team.

## Recent Installations

Recently installed traps and ranges include:

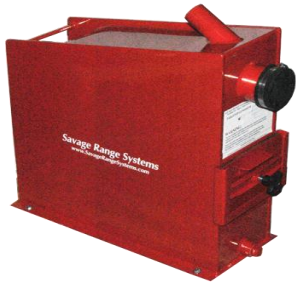

- Agawam Gun Club
- Fort Lewis
- KRISS
- Remington Arms
- Texas Christian University

## Warranty Reminder

Altering or modifying our products, or using them in an inappropriate manner not only **voids any warranty**, but **may be unsafe**. If you are tempted to change the product or its use in any way, please call us.

## Tabletop Gunsmith

With gasoline prices climbing again, the **GT** can **save you time and money** by enabling test firing without having to drive to a range. The **GT** handles low volume feed and function testing up to 4,100 FPE. For moderate to high volume feed and function testing up to 8,100 FPE, our **GD (\$4,695)** is the trap of choice. Additionally, the **GHD (\$7,995)** handles high volume feed and function testing up to 13,000 FPE.

GT \$1,595

## Online Store

Our **Online Store** will open on **November 5<sup>th</sup>**. Thereafter, you will have the ability to conveniently order a selection of parts and products online. The store can be accessed through our website [www.savagerangesystems.com](http://www.savagerangesystems.com)

## Training Towers

We have added **Training Towers** to our product line. These towers help train personnel to rappel, and shoot up or down at a steep angle.

As each installation is unique, based on user requirements and engineering considerations (soil conditions etc.), please contact us to discuss your needs.

## Mission Statement

“Savage Range Systems offers the safest and cleanest environment possible for shooters and range personnel, while providing innovative, durable and cost-effective range equipment.”
