

Specialty Bullet Traps

SPECIALTY BULLET TRAPS

Savage Range Systems Boxtrap Series and Proof and Function Bullet Traps incorporate Wet Snail™ technology within the deceleration chamber to virtually eliminate lead particles before becoming airborne and inhaled. Meets and exceeds OSHA standards, protecting employees and shooters.

The Boxtrap Series Bullet Traps are designed for ballistics laboratories, firearms manufacturers and military facilities that are serious about eliminating environmental health and safety problems.

BENEFITS

- For firearms, ammunition and accessory manufacturers.
- Close-quarters function testing.
- Wet Traps virtually eliminate lead dust and unburned-gunpowder hazard.
- Low maintenance.
- Captures bullets safely for recycling.
- Perform feed and function testing in-house.
- Creates a clean, safe environment for employees.

SPECIFICATIONS

- Fully welded, one-piece construction.
- Low-angle entrance ramps and deceleration chamber manufactured from AR500.
- Recirculation system equipped with a submersible pump that circulates fluid through the spray bar to lubricate ramps and deceleration chamber.
- Self-contained lead recovery tank.
- Designed for single fire only (except for model 850).

MODELS AND OPTIONS

Boxtrap Models: For targeting, velocity and feed and function testing up to 8,100 FPE.
